General quality analysis

The overall quality of the application can be estimated as medium. The total number of defects is [23](#). 1 of them has critical severity and 3 defects gain the major severity. Gui defects are common. The majority of defects are functional. A detailed quality analysis is presented below. 3 out of 8 modules contain no defects at all.

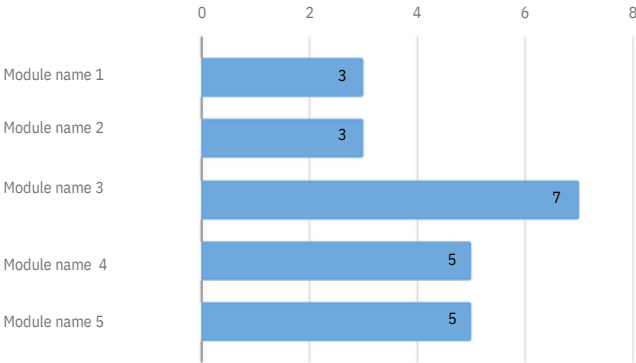

Detailed quality analysis

The total number of defects by severity

The chart shows the statistics of defects by the degree of the negative i have on the application. Almost 60% of issues have minor and Average severity. 3 Major defects has been found. One critical defect detected

The total number of defects by modules

The chart represents defects quantity of modules. The majority of issues are present in Module name _received

Quality of separate modules

Module	Quality	Comments
Module name 1	Low	The quality of this section can be estimated as Low. The issue QATC-843885 concerns Function: incomplete accounts are available for creation
Module name 2	Low	The quality of this section can be estimated as Low. The same issue QATC-843885 concerns Function: incomplete accounts are available for creation. Which latter down the line creates cascade of issues
Module name 3	High	No defects were detected for this module.
Module name 4	High	No defects were detected for this module.
Module name 5	Medium	The quality of this section is estimated as medium. 1 average defect were found. Notification email sending functionality is not present QATC-843983 .
Module name 6	Medium	1 defect were opened in this module. The most significant defect here is lack of photos and descriptions QATC-844045 .
Module name 7	High	No defects were detected for this module.
Module name 8	Low	In general, the quality of this module can be estimated as low. Two major defects were found here, some data is not available for report generation QATC-844060 and graps containing not actual data QATC-844072
